

Advance Steel 8.1 / SP3

This document describes the improvements in **Service Pack 3** for **Advance Steel 8.1**.

MODELING

- The area calculation is improved for folded plates

JOINTS

- “Splice” Joint: the Joint Design according to AISC calculates the correct net area.

DETAILING

- Detail explode settings: it considers the line type settings defined by the user.

DSTV-NC FILES

- The DSTV-NC files of parts containing threaded holes are correct.
