

# Advance - Concrete suite 6.1 SP2 Content

[www.graitec.com](http://www.graitec.com)

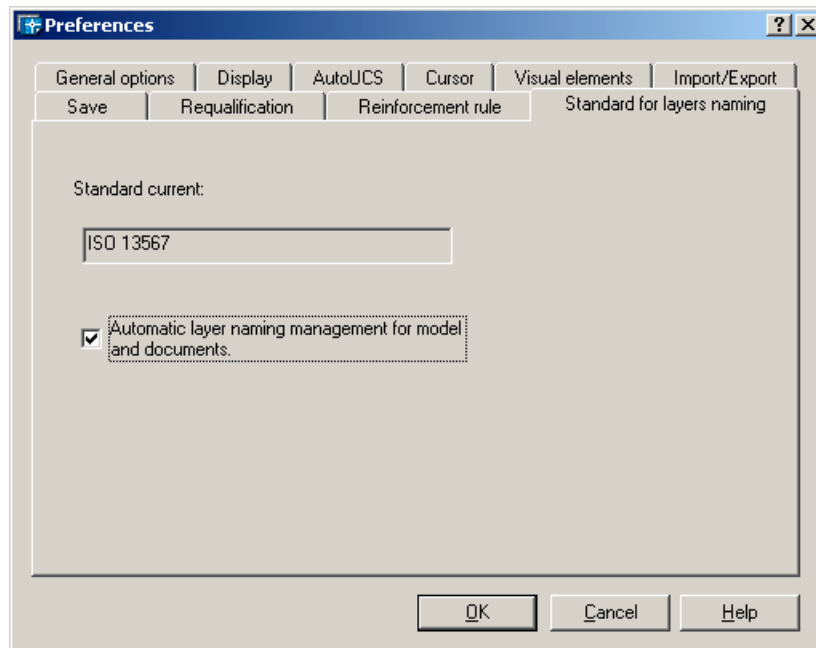

## TECHNOLOGY

### Compatibility

→ Allowed compatibility with steel detailing from Advance Steel 5.1

### Disable layer Naming Manager

→ The option to disable the layer naming manager has been added.

### Layer standards

→ The layer standards have been corrected in the French version for AutoCAD 2002.

## **MODEL**

### **Copy level**

→ Copy level above/below now copies the plane view on request.

### **Level name update**

→ Corrected a defect that could prevent level name update on altitude change.

## **DRAWINGS**

### **Plot to DWF**

→ A crash on plotting to dwf structural elements with solid hatches has been solved.

### **View update**

→ Corrected a defect that caused user created hatches to be erased on view update.
