

Advance Concrete 2010 SP4 What's new

This document describes the improvements and fixes that are included in SP4.

www.graitec.com

Technology

- Added access to new properties through the COM API link.
- The drawings are correctly saved in the French version of Advance Concrete.

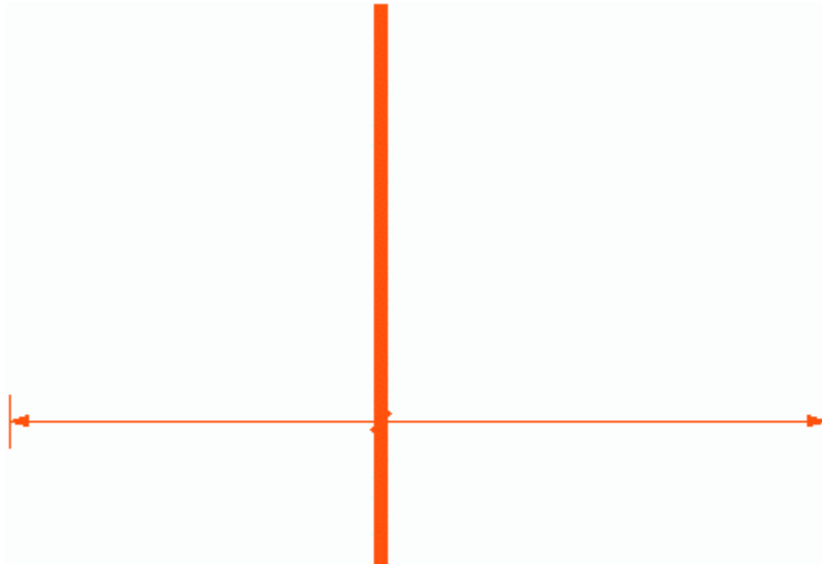

Reinforcement

Plotting distribution lines

- The linear distributions represented with dimension lines are plotted.

Plotting distribution lines

- Solid arrowheads from the distribution representation are represented in layouts.

Reinforcement drawings: top view orientation

- In reinforcement drawings, the top views have the correct orientation.

Bar length calculation

- The bar length is correctly calculated based on the formula defined in the shape library.
- Straight bars with hooks are recognized as shape codes 11, 21, 22, 23, according to the hook angle and direction.
