

Advance Design 2018 R2 - Hotfix 1

GENERAL APPLICATION

Hotfix 1 (**build 13142**) for Advance Design 2018 R2 (build 13141) includes the following fixes:

- Fixed reinforced concrete design according to EC3 and now the calculation works including in some particular scenarios. [Ref. #15699]
- Fixed model generation with planar elements and now models comprising planar elements successfully generate including in some specific scenarios. [Ref. #15734]
- Fixed loading EC2 design results and now models with EC3 results load including in some particular scenarios. [Ref. #15762]
- Fixed 2nd deflection criterion verification for US/CAN. Verification of steel elements for 2nd deflection criterion for USA and Canada codes is fully available. [Ref. #18225]
