# What's New

 ADVANCE  
**POWERPACK**  
for Autodesk® Advance Steel

## 2017 R2

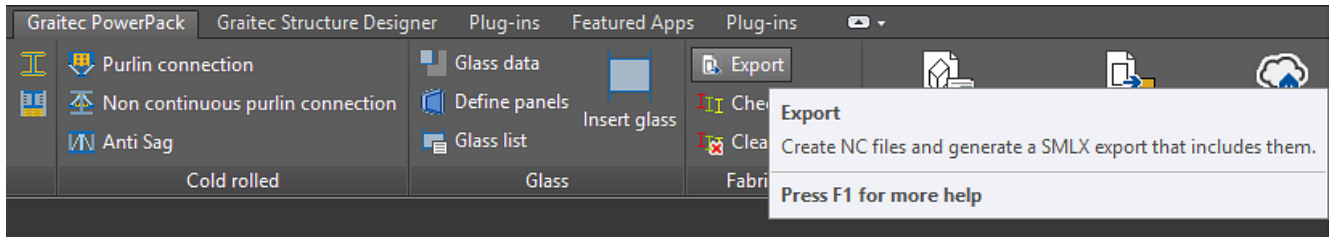

## Table of Contents

<b>NEW .....</b>	<b>4</b>
Fabrication export.....	4
New cold rolled profiles for Joriside.....	4
New cold rolled table for Bacacier C .....	5
New cold rolled table for Bacacier Z.....	5

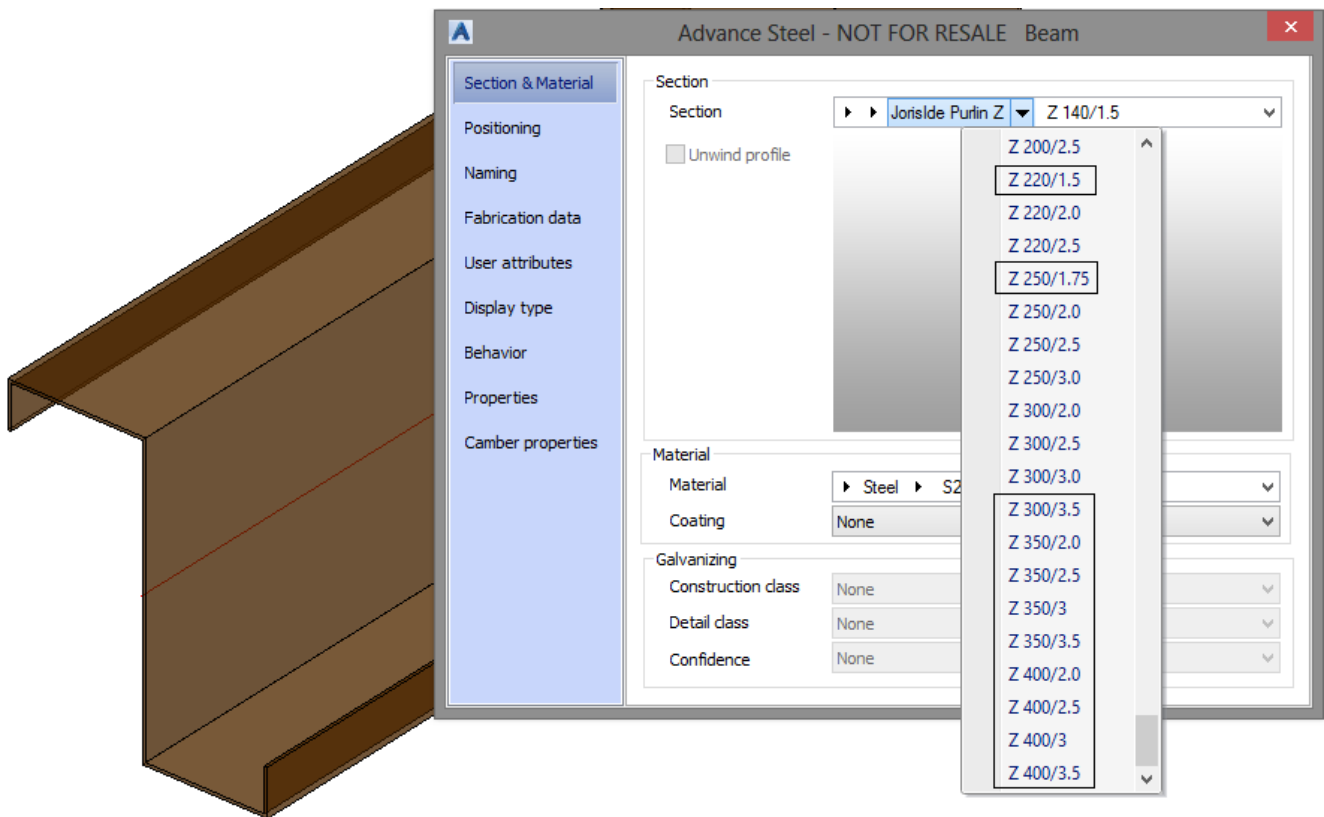

**New**

**Fabrication export**

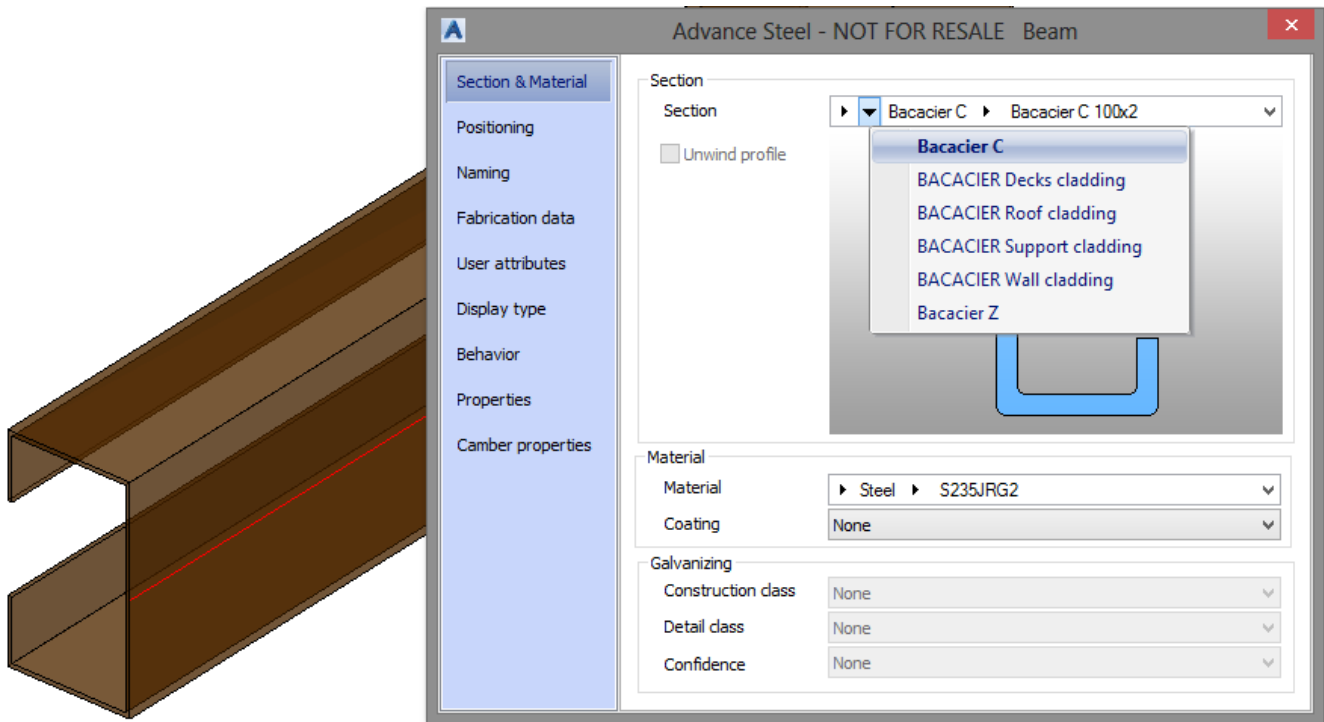

The "Export" command creates the NC files required for fabrication, and then starts the SMLX export. The result is a single SMLX file, including the complete model geometry and all the single part NC files required for fabrication. The SMLX file for the entire project can be seamlessly imported into Advance Workshop.

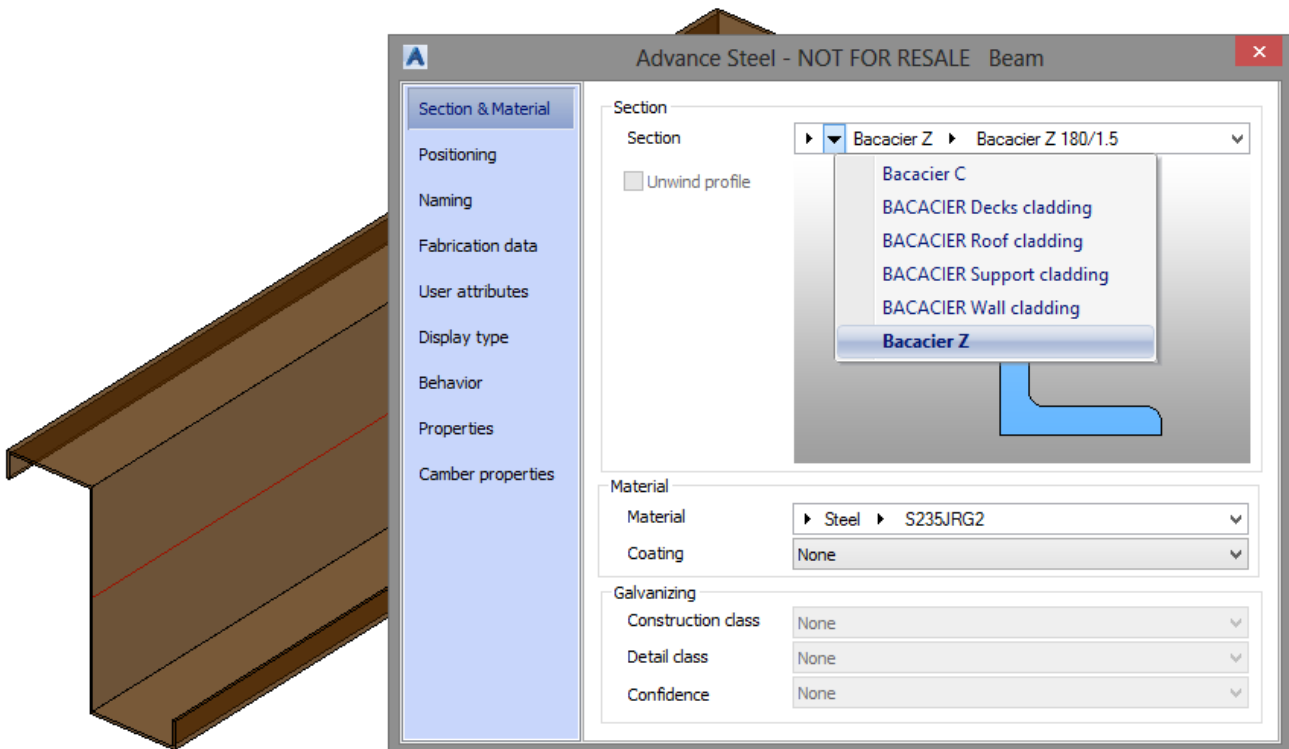

**New cold rolled profiles for Jorisode**

**New cold rolled table for Bacacier C**

**New cold rolled table for Bacacier Z**
